

SHETH LUJ AND SIR MV COLLEGE

Aim : Creating Interactive Dashboards and Data Stories

- Design a basic dashboard layout using sheets
- Add filters and interactive controls
- Implement highlight and filter actions
- Use URL and set actions for interactivity
- Create dynamic dashboards using parameters
- Design dashboards for multiple devices
- Build a complete data story using Story feature

a) Design a basic dashboard layout using sheets

SHETH LUJ AND SIR MV COLLEGE

1. Create Basic Sheets

Create several worksheets first. These sheets will later be combined into a dashboard.

Sheet 1 – Total Athletes

1. Rename the sheet to Total Athletes.
2. Drag **Name** to Text.
3. Right-click **Name**.
4. Select Measure → Count (Distinct).
5. You will get the total number of unique athletes.

Purpose: Shows the total number of athletes in the dataset.

[illegible]

- NISHITA GIRI T080**

SHETH LUJ AND SIR MV COLLEGE

3. Drag **Year** to Columns.

4.

Drag **Name** to Rows.

5. Change **Name** to Count Distinct.

6. Select the Line Chart from Show Me.

Purpose: Shows how athlete participation changes over the Olympic years.

Sheet 3 – Medals by Country

1. Create a new worksheet.
2. Rename it Medals by Country.
3. Drag **Team** to Rows.
4. Drag **Medal** to Columns.
5. Drag **Name** to Text.
6. Change **Name** to Count.
7. Filter **Medal**.

SHETH LUJ AND SIR MV COLLEGE

8. Select:

- Gold
- Silver
- Bronze

9. Choose Bar Chart.

Purpose: Compares Olympic medal counts among countries.

Sheet 4 – Medals by Sport

1. Create a new worksheet.
2. Rename it Medals by Sport.
3. Drag **Sport** to Rows.
4. Drag **Name** to Columns.
5. Change **Name** to Count.
6. Drag **Medal** to Color.
7. Filter out blank Medal values.

Purpose: Shows which sports have the highest number of medals.

SHETH LUJ AND SIR MV COLLEGE

Sheet 5 – Gender Distribution

1. Create a new worksheet.
2. Rename it Gender Distribution.
3. Drag **Gender** to Columns.
4. Drag **Name** to Rows.
5. Change **Name** to Count Distinct.
6. Select a Bar Chart.

Purpose: Compares male and female athlete participation.

SHETH LUJ AND SIR MV COLLEGE

1. Create the Basic Dashboard

Now combine the worksheets.

1. Click New Dashboard at the bottom.
2. Set the dashboard size to Automatic.
3. Drag Athletes by Year onto the dashboard.
4. Drag Medals by Country below or beside it.
5. Drag Medals by Sport onto the dashboard.
6. Add Gender Distribution.
7. Add the Total Athletes sheet as a KPI card.

SHETH LUJ AND SIR MV COLLEGE

1. Add Filters

Filters allow users to interactively change the dashboard.

Add Year Filter

1. Open the **Athletes by Year** worksheet.
2. Drag **Year** to **Filters**.
3. Select **All values**.
4. Right-click the filter.
5. Select **Show Filter**.

You can now select individual Olympic years.

SHETH LUJ AND SIR MV COLLEGE

Add Season Filter

1. Drag **Season** to **Filters**.
2. Select **All**.
3. Select **Show Filter**.

SHETH LUJ AND SIR MV COLLEGE

Add Gender Filter

1. Drag **Gender** to **Filters**.
2. Select **Show Filter**.

1. Add Interactive Controls

Interactive controls allow users to explore the dashboard.

Useful controls for this dataset are:

- Year
- Season
- Gender
- Sport
- Team
-

Medal For

example:

1. Select the **Year** filter.
2. Change its style to **Single Value Dropdown**.
3. Select **2020**.

SHETH LUJ AND SIR MV COLLEGE

4. The dashboard will update to show information for 2020.

1. Implement Highlight Actions

Highlight actions emphasize related data when the user selects a particular value.

SHETH LUJ AND SIR MV COLLEGE

Example: Highlight a Sport

1. Open the dashboard.
2. Select **Dashboard** → **Actions**.
3. Click **Add Action** → **Highlight**.
4. Set:

Source Sheet: Medals by Sport

Target Sheet: Medals by Country

5. Select **Run action on: Select**.
6. Click **OK**.

Now, when you select a sport, related information will be highlighted in other charts.

7. Implement Filter Actions

A filter action allows one chart to filter another chart.

Example

NISHITA GIRI T080

SHETH LUJ AND SIR MV COLLEGE

When the user clicks a country, display only that country's sports and medals.

1. Open the dashboard.
2. Select **Dashboard** → **Actions**.
3. Select **Add Action** → **Filter**.
4. Select:

Source: Medals by Country

Target: Medals by Sport

5. Select **Run action on** → **Select**.
6. Click **OK**.

Now clicking a country will filter the sport chart.

SHETH LUJ AND SIR MV COLLEGE

1.

Use URL Actions

URL actions can open an external webpage when a user selects an item.

For example, you can create a link to Wikipedia for an Olympic sport or country.

NISHITA GIRI T080

SHETH LUJ AND SIR MV COLLEGE

Steps

1. Open the dashboard.
2. Go to **Dashboard** → **Actions**.
3. Click **Add Action** → **Go to URL**.
4. Enter a URL such as:

<https://en.wikipedia.org/wiki/<Sport>>

ort>

5. Use the **Insert** option to insert the **Sport** field dynamically if supported by the URL action.
6. Set **Run action on** → **Select**.
7. Click **OK**.

When a user selects a sport, Tableau can open the corresponding webpage.

Purpose: Provides additional external information about selected Olympic data.

SHETH LUJ AND SIR MV COLLEGE

9. Use Set Actions

Set actions allow users to dynamically select members of a dimension.

Example: Select Countries

First create a set.

1. Open the **Medals by Country** worksheet.
2. Right-click **Team**.
3. Select **Create** → **Set**.
4. Name it:

Selected Countries

5. Leave the set initially empty or select some countries.
6. Click **OK**.

Now create the action:

1. Open the dashboard.
2. Select **Dashboard** → **Actions**.
3. Click **Add Action** → **Change Set Values**.
4. Select:
 - Source Sheet: **Medals by Country**
 - Target Set: **Selected Countries**
5. Select **Run action on** → **Select**.
6. Click **OK**.

Now clicking countries dynamically changes the set.

SHETH LUJ AND SIR MV COLLEGE

10 . Create a Dynamic Dashboard Using Parameters

Parameters allow users to dynamically select what they want to analyze.
